Sun in Virgo
4° Vir 37' 06"

The Sun is the most visible and important planet of astrology at the level of physical life and symbolically represents ego and will. The Sun spends about 30 days in each sign, so that the cycle of the 12 signs defines our year. With Sun in Virgo, and especially in the beginning of this period, the harvest with its symbolism of organization and service becomes the norm for everyone's behavior. Along with nature herself, we are starting to pull back from the plentitude of the growing season, cataloging and storing up our nuts for the winter. We are moving into a more collective mode, and are quieter and more serious as befits a more sober weather outlook.

Moon in strong square with Saturn

The planetary energies conflict; internal and creative tensions bring rich rewards through effort over time.

The Moon symbolizes instinctive awareness and Saturn is the planet of restriction and structure. With the Moon square or opposite Saturn there is a potential conflict between emotions and limits. It might be difficult to express sentiments to others. You might also feel somewhat shut down emotionally. There could also be the ability to crystallize feelings about an important matter through hard work.

Aspect details: Moon in strong square (within 2.3 degrees) with Saturn.
